Experience

Prompt Opinion, Software Engineer

Sep 2025 – present

AI Healthcare Copilot Platform

- ❖ Developed and integrated Model Context Protocol (MCP) tools in C# (.NET) to enable seamless LLM–EHR interoperability via the FHIR API, supporting a marketplace of specialized healthcare AI solutions
 - ❖ Built and maintained the Prompt Opinion web platform, developing RESTful endpoints connected to PostgreSQL and implementing dynamic Vue.js components to deliver a responsive user experience
- Vue / TypeScript / C# ASP.NET / PostgreSQL / Docker / FHIR API*

Fung Institute for Engineering Leadership, Data Analytics & UX Intern

Aug 2025 – present

UC Berkeley Master of Engineering Program

- ❖ Cleaned & aggregated spreadsheet data from pulse surveys, built dashboards that conveyed program metrics to stakeholders in order to improve MEng Capstone Project resource allocation and quality for over 450 students
 - ❖ Designed the MAS-E Master's of Engineering program course planner for students & student tracker for internal use
- Python / Tableau / Excel*

Darena Health, AI & Data Science Intern

Jun – Aug 2025

AI-enabled, FHIR-first Health IT Platform

- ❖ Developed an MCP server to integrate an LLM-powered chatbot with a MeldRx-hosted EHR, enabling real-time access to patient data for cardiovascular risk scoring and clinical trial matching
 - ❖ Implemented a cardiovascular risk calculator within the chatbot to provide 10-year disease predictions
- TypeScript / Docker / FHIR API*

Digital NEST, Frontend Web Developer Intern

Aug 2023 – Aug 2024

Central Valley-based Web and Graphic Design Nonprofit

- ❖ Coordinated with clients in education and recreational industries to produce, develop, and maintain websites using WordPress, JavaScript, and PHP, boosting page visits by 200% and maintaining user bounce rates at 36% on average
 - ❖ Created an internal tooling job board with over 200 job listings by web scraping data from LinkedIn and Indeed
- TypeScript / JavaScript / jQuery / WordPress / PHP / React / NodeJS / Python*

Education

University of California, Berkeley

Expected Grad May 2026

B.A. Data Science

- ❖ Coursework: AI/ML, Probability Theory, Data Engineering, Data Structures, Numerical Analysis
- ❖ Domain focus in Applied Math & Modeling; Clubs/Orgs: Cal VSA Lion Dance (Music Lead)

Gavilan College, Dual Enrollment with High School

Grad May 2023

A.S. Computer Programming

Projects

LLM Stock Trading Benchmark – github.com/vkethana/calhacks-24

Flask/React App for Testing Profit Net Loss from LLM Stock Trades Based on News Headlines

- ❖ Enhanced Flask API performance by implementing React state memoization, enabling the efficient handling of over 300 trade queries per evaluation period and minimizing component render overflow
- Flask / Python / React / TypeScript / NodeJS / Groq*

American Sign Language Vision-to-Text Translator – jamesvdinh.github.io/asl-translator

Computer Vision Model Trained on a Dataset of 87,000+ Data Points

- ❖ Trained a TensorFlow multiple linear regression model to learn 26 ASL gestures from NIDCD which feeds into a MediaPipe website application and interprets sign language from a webcam live feed via OpenCV
- Python / TensorFlow / MediaPipe / OpenCV / JavaScript*

Skills

- ❖ Python, TypeScript, JavaScript, React, Vue, NodeJS, jQuery, WordPress, Wix Velo, PHP, GraphQL, SQL, R, C# .NET, C++, Java, Docker, Flask, HTML, CSS / SASS, Git, REST API, FHIR, MapBox, TensorFlow, MediaPipe
- ❖ Personal: Boulderling, Lion Dance, Videography, Guitar, Piano, Table Tennis, Chess, Badminton
