Experience

Prompt Opinion, Software Engineer

Sep 2025 – present

AI Healthcare Copilot Platform

- ❖ Designed and implemented MCP tools enabling LLM integration with EHR systems using C# .NET and FHIR API, powering a marketplace of specialized healthcare AI solutions
- ❖ Developed and maintained default MCP servers, supporting independent open-source contributions on GitHub
TypeScript / C# .NET / PostgreSQL / Docker / FHIR API

Fung Institute for Engineering Leadership, Data Analytics & UX Intern

Aug 2025 – present

UC Berkeley Master of Engineering Program

- ❖ Cleaned & aggregated spreadsheet data from pulse surveys, built dashboards that conveyed program metrics to stakeholders in order to improve Capstone resource allocation and quality for over 450 students
- ❖ Designed the MAS-E Master's of Engineering program course planner for students & student tracker for internal use
Python / Tableau

Darena Health, AI & Data Science Intern

Jun – Aug 2024

AI-enabled, FHIR-first Health IT Platform

- ❖ Developed an MCP server to integrate an LLM-powered chatbot with a MeldRx-hosted EHR, enabling real-time access to patient data for cardiovascular risk scoring and clinical trial matching
- ❖ Implemented a cardiovascular risk calculator within the chatbot based on the 2013 ACC/AHA Guideline on CVD risk assessment, leveraging FHIR patient data (e.g., age, BP, cholesterol) to provide 10-year disease predictions
TypeScript / Docker / FHIR API

Digital NEST, Frontend Web Developer Intern

Aug 2023 – Aug 2024

Central Valley-based Web and Graphic Design Nonprofit

- ❖ Coordinated with clients in education and recreational industries to produce, develop, and maintain websites using WordPress, JavaScript, and PHP, boosting page visits by 200% and maintaining user bounce rates at 36% on average
- ❖ Created an internal tooling job board with over 200 job listings by web scraping data from LinkedIn and Indeed
TypeScript / JavaScript / jQuery / WordPress / PHP / React / NodeJS / Python

Education

University of California, Berkeley

Expected Grad May 2026

B.A. Data Science

- ❖ Coursework: AI/ML, Probability Theory, Data Engineering, Data Structures, Numerical Analysis
- ❖ Domain focus in Applied Math & Modeling; Clubs/Orgs: Cal VSA Lion Dance (Music Lead)

Gavilan College, Dual Enrollment with High School

Grad May 2023

A.S. Computer Programming

Projects

LLM Stock Trading Benchmark – github.com/vkethana/calhacks-24

Flask/React App for Testing Profit Net Loss from LLM Stock Trades Based on News Headlines

- ❖ Enhanced Flask API performance by implementing React state memoization, enabling the efficient handling of over 300 trade queries per evaluation period and minimizing component render overflow
Flask / Python / React / TypeScript / NodeJS / Groq

American Sign Language Vision-to-Text Translator – jamesvdinh.github.io/asl-translator

Computer Vision Model Trained on a Dataset of 87,000+ Data Points

- ❖ Trained a TensorFlow model to learn 26 ASL gestures from the NIDCD which feeds into a MediaPipe website application that interprets sign language from the webcam's live feed via OpenCV
Python / TensorFlow / MediaPipe / OpenCV / JavaScript

Skills

- ❖ Python, TypeScript, JavaScript, React, NodeJS, jQuery, WordPress, Wix Velo, PHP, GraphQL, SQL, R, C# .NET, C++, Java, Docker, Flask, HTML, CSS / SASS, Git, REST API, FHIR, MapBox, TensorFlow, MediaPipe, Pandas
- ❖ Personal: Boulderling, Lion Dance, Videography, Guitar, Piano, Table Tennis, Chess, Badminton
